Education	Skills
Bachelors Degree in Computer Engineering Vivekanand Education Society's Institute of Technology 2025 Chembur, CGPA : 8.92	Soft Skills: Time Management, Adaptability, Problem Solving, Team Work, Leadership
Diploma in Computer Engineering Vivekanand Education Society's Polytechnic 2022 Chembur, 87.31%	Programming Languages: C, C++, Java, PHP, SQL, HTML, CSS, JavaScript
Secondary Education (SSC) Hare Krishina N.C.T Convent High School 2019 Ulhasnagar, 73.20	Libraries & Frameworks: React, JQuery, Bootstrap, TailwindCSS, TestNG, Cucumber, Laravel
	Tools & Technologies: Git, NodeJS, Composer, Maven, Selenium, Cypress, Figma, VS Code, IntelliJ, NetBeans, PostCSS, Babel, Webpack, MySQL, SQLite, Xampp, Postman, WorkBench, Oracle DB

Projects
SecureChat  Java Networks - A robust chat application utilizing Socket programming for secure communication. Implemented custom DES encryption and XML format to ensure data security and integrity. - Applied Object-Oriented Programming (OOP) principles for structured codebase and scalability.
Auth Guard  HTML CSS JS PHP SQL - Developed a robust Auth Guard system inspired by Laravel, incorporating secure user management, password hashing, and CRUD operations. - Implemented automated database migrations and a dynamic query builder with prepared statements - Designed a comprehensive validation framework with custom error handling and user input verification. - Integrated session and token-based authentication for persistent user sessions and enhanced security.
Insight Ink  Laravel Bootstrap Seelenium - Developed and tested a dynamic blogging platform using MVC architecture, leveraging Blade templating and Eloquent ORM for efficient data management and presentation. - Automated tests using Selenium and structured with the Page Object Model (POM) to validate functionality, identify bugs, and ensure high application reliability, emphasizing quality assurance for superior user satisfaction - Identified and resolved performance bottlenecks, improving application efficiency through strategic optimizations and detailed testing.
Film Fiesta  React Tailwind CSS - Developed a dynamic Single-Page (SP) web application using React, allowing users to explore movies, TV shows, and celebrities. - Implemented efficient API management with AbortController to optimize request handling for significantly improved performance. - Integrated React Router to ensure seamless navigation between different sections. Created custom hooks to streamline data fetching and state management enhancing code reusability.
Quill Plus E2E Testing  Cypress JS Cucumber - Automated end-to-end testing for Quill Plus using Cypress, focusing on Behavior-Driven Development (BDD). - Conducted API testing to validate data integrity. Implemented Cucumber HTML report generator for detailed test reporting and issue tracking. - Identified flaky test cases to enhance test reliability and quality assurance.

Participations and Achievements
- 1st in Webathon2.0 conducted by CSI VESIT - Automation Testing Certification - Study Link (June 2024)  - Participated in CodeStorm and Syrus Hackathons
