INTERNSHIP

Internship at Rising Phoenix

20th May – Present

Working on AZURE service (Storage Accounts) security checks and Postgres database along with python to store the results of security checks. Also, working on development of CI/CD Pipeline in AWS and pulling docker images from docker hub and pushing it to ECR.

PROJECTS

1) Empower Her – A women safety and empowerment app.

- Leading the development of a comprehensive app featuring unique safety tools such as fake call, SOS contacts, and location tracking via SMS using Kotlin, Jetpack Compose, Firebase, SQLite.
- Introducing a dynamic police station locator for real-time assistance and a Women Empowerment module with events hosted by entrepreneurs, fostering community engagement. Also connected the app to X (Twitter).
- So, any event hosted, the details will be tweeted automatically. Integrated a payment gateway to book seat.
- Facilitating direct learner-entrepreneur interaction through a common Q&A section, enhancing knowledge-sharing within the user community. Also integrated a video conferencing feature for webinars and one on one interaction.

2) Smart Food Management and Waste Reduction Application.

- Engineered an Android application tailored for Hotels and Restaurants in Java, enabling efficient inventory management.
- Implemented a smart tracking system for stock levels, providing stakeholders with real-time insights into available items.
- Integrated an expiry date management feature, streamlining decision-making by ensuring the prioritized use of items nearing expiration.

3) Decision Desk - Online Voting Portal.

- Developed an online voting portal utilizing React JS for the frontend and Express JS for the backend, MongoDB for database.
- Admin can view real-time data on candidate votes and available constituencies. Interactive pie charts allow the admin to analyze voting trends, showing who is winning and by how many votes.
- Users can cast their votes, ensuring each user votes only once. Only users above 18 years are allowed to vote.

TECHNICAL SKILLS

- **Programming Languages:** Java, C, Python.
- **Android Development:** Jetpack Compose.
- **Web Development:** HTML, CSS, JavaScript, ReactJS, ExpressJS.
- **Database Management:** SQL, MongoDB.
- **Version Control:** Git.
- **Cloud Services:** AWS, Microsoft Azure.
