SUMMARY

Hello, I'm a Final Year passionate Engineering Undergraduate Student studying Artificial Intelligence & Data Science with a minor in Blockchain Technology. I am committed to excellence with a strong belief in integrity and authenticity. I am eager to apply my skills for personal and company growth, while also contributing to positive change in the world through collaboration with talented individuals.

EDUCATION

Vivekanand Education Society's Institute of Technology, Chembur

December 2021-May 2025

B.E. Artificial Intelligence and Data Science, Minor: Blockchain

CGPA: 9.093 (Sem 6)

Relevant coursework: Operating Systems, Data Structures, Analysis of Algorithms, Machine Learning, Cloud Computing, DBMS, Deep Learning, DevOps, Software Engineering

Rao Junior College of Science, Thane

July 2021-August 2021

HSC-Science

Percentage: 94.00

Don Bosco High School, Dombivli

June 2016-May 2019

SSC

Percentage: 97.00

WORK EXPERIENCE

Bhabha Atomic Research Centre (BARC) | Project Intern

May 2024 – July 2024

- Conducted comprehensive evaluation of various Classification and Regression ML and DL models on raw signal datas' features processed from eddy current technique for insulated pipe measurement, achieving a Random Forest model accuracy of 94% and XGBoost accuracy of 91%.
- Developed a versatile Streamlit App to streamline and generalize Machine Learning and Deep Learning algorithms for diverse applications. The app includes functionality for data preprocessing, feature selection, model training, hyperparameter tuning, and performance testing.
- [Certificate Link](#)

PROJECTS

Mock Interview Assistant | Streamlit, BERT, Firebase, Matplotlib, VSCode

[🔗 Link](#)

- Developed a mock interview platform with Streamlit for UI, BERT for NLP, and Firebase for authentication. Parsed resumes are provided to Gemini API for generating questions, and evaluated responses via speech-to-text.
- Provided feedback and improvement suggestions, and visualized performance using Matplotlib.

Sign Language Interpreter | YOLOv5, Flask, VSCode

- Developed and trained a YOLOv5 model on a custom dataset to accurately detect American Sign Language (ASL) gestures.
- Integrated the trained model into a web application using the Flask framework, enabling real-time detection and translation for users achieving accuracy of 0.88 on ASL alphabets.

Auction App | React, MongoDB, Node.js, VSCode

- Developed a full-stack auction platform with MERN stack, featuring user authentication, dynamic bidding, and item management.
- Utilized React for UI, Express and Node.js for server-side, and MongoDB for data storage.

ACHIEVEMENTS

Certifications

- AWS Academy Cloud Foundations.
- Ask Questions to make Data Driven Decisions
- Google: Coursera.
- Anomaly Detection NVIDIA.
- Fundamentals of Deep Learning NVIDIA.

SKILLS

- Languages:** Python, C/C++, SQL, JavaScript, HTML/CSS
- Frameworks:** Flask, React JS, Bootstrap, Node.js
- Databases:** Firebase, MySQL, MongoDB
- ML Libraries:** NumPy, Pandas, Matplotlib, Scikit-Learn, Seaborn
- Visualization Tools:** PowerBI, Tableau
- Other tools:** Git & GitHub, Figma, VSCode, Jupyter NB, PyCharm
