Experience

Cere Labs May 2024 – July 2024
Software Engineer Intern

- Developed a parser for html documents that extracts text from html pages to be ingested for chatbot.
- Developed a service that extracts html pages related to user query and uploads it to another internal service.
- Improved performance of existing website by changing a polling request to a websocket connection.

Projects

AI YouTube Search | *PyTorch, BERT, Streamlit, Pinecone*

- Created a RAG (Retrieval-Augmented Generation) system for a limited YouTube video dataset.
- Embedded video transcripts using sentence BERT and stored embeddings in Pinecone vector database.
- Developed a user interface with Streamlit to facilitate user interaction and video search.

Credit Card Fraud Detection | *Python, Flask, React*

- Developed a machine learning model for detecting fraud in a highly imbalanced credit card transaction dataset.
- Implemented SMOTE and undersampling techniques to improve model accuracy.
- Created a backend server using Flask and a frontend interface using React.

Price Tracker | *NextJS, MongoDB, BrightData*

- Developed a price tracker using NextJS that monitors prices of Amazon products and sends email upon price drops.
- Utilized MongoDB for data storage and BrightData for web scraping.

Spell Checker | *Python, Tkinter, Flask*

- Implemented using Levenshtein Minimum Edit Distance Algorithm for accurate suggestions.
- Enabled user customization via 'Add to Dictionary' feature.
