EDUCATION

Vivekanand Education Society's Institute of Technology

Mumbai

Bachelor's in Electronics and Telecommunication

December 2021 - June 2025

CGPA: 9.12

EXPERIENCE

Reliance Industries Limited | Project intern

May 2024 - June 2024

- Developed a chatbot to assist telecom field workers with solving issues using visual and theoretical solutions, deployed on Telegram, WhatsApp, and website platforms.

SKILLS

Programming Languages: C++, Python, SQL, Verilog

Libraries/Frameworks: Node.js

Databases: MySQL

PROJECTS / OPEN-SOURCE

Height Prediction Using Linear Regression

Jupyter Notebook

- The project utilizes linear regression to predict height based on various input factors such as age, gender, and parental height.
- By analyzing these factors, the model provides estimations for individual height outcomes, contributing to growth assessment and personalized healthcare strategies.

Energy Monitoring System Using Arduino And Raspberry Pi

Arduino IDE, Firebase

- An energy monitoring system to track and display individual appliance consumption, aiding in identifying faulty devices and optimizing energy usage.
- It enhances billing efficiency, enables remote meter readings, and fosters transparency in the billing process for consumers.

32 bit signed and unsigned multiplier

Xilinx Integrated Software Environment

- The project innovates a novel 32-bit multiplier design employing optimized algorithms for signed and unsigned multiplication.
- Utilizing hardware techniques like parallelization and pipelining, it achieves high-speed operation and enhanced area efficiency, ensuring continuous data flow and minimal idle time within the hardware.

Electric Vehicle - Battery Management System with Charge Monitor & Fire Protection *Arduino IDE*

- To keep the battery within the safety operation region in terms of voltage, current and temperature during charge and discharge.

Telecom Workers Support Chatbot

Botpress, Python

- Developed an AI-driven chatbot to assist telecom field workers in resolving issues through visual and theoretical solutions.
- The chatbot provided real-time AI-generated answers and delivered video and image solutions to enhance problem resolution.
- Deployed on platforms like Telegram, WhatsApp, and the company website, it significantly improved efficiency and access to critical information for field workers.
