Holy Cross Convent High School

SSC: 91.30%

Thane, India

June 2014 – April 2019

EXPERIENCE

Jhaveri Thanawala School For Deaf

July 2024 – Present

Web Development Intern

- Developed a full-stack web application using Flask for sign language recognition using Random Forest algorithm.
- Utilized YOLOv8 to achieve better results.
- Providing learning modules that make use of visualizations.

PROJECTS

Signova | *Full Stack Web Application, Flask, Machine Learning*

- Developed a full-stack web application using Flask for sign language recognition using Random Forest and OpenCV.
- Carried out preprocessing on the images of signs using Simple Vision, Threshold Vision, Canny Vision and Skeleton Morph Vision.
- Introduced quizzes for tests and practice.
- Provided flashcards for learning.

Fin.Ally | *Progressive Web Application, Flask, Machine learning*

- A progressive web application to improve financial literacy among young individuals.
- Implemented Atlas Charts for visualisation of expenditure and saving dashboard.
- Used the Decision Tree algorithm to recommend suitable investment products based on various attributes.
- Made a progressive web app to support notifications for reminders in the chore management element.
- Introduced various games to make financial learning fun.

KiddoShield | *Full Stack Web Application*

- Created a web application which aimed to help make the vaccination appointment booking process easier.
- Implemented the Leaflet library for maps.

ATM Simulator | *JAVA Application, MySQL*

- Created a simulator which helped understand the transactions of an ATM.
- Provided functionalities like deposit, withdraw and balance check.
- MySQL Workbench was used to create and manage the database.

ACHIEVEMENTS AND OTHER ACTIVITIES

Technical Achievements

- Qualified for the zonal round of Aavishkar, 2023.
- One of the 3 finalist teams in Nomura's Kakushin 8.0 Hackathon out of 144 teams from VESIT.

Co-curricular

- Reporter and a member of the executive team of VesitConnect, the college's letterhead team, during the second and third years.
- Volunteered at Aarna Foundation, Thane, over a period of one month.

TECHNICAL SKILLS

Languages: Python, Java, C++, JavaScript

Frameworks, Databases and Technologies: Flask, NodeJS, React, AngularJS, MongoDB Atlas, Atlas Charts, SQL, Git
