EDUCATION

Bachelor of Engineering in Information Technology, VESIT
CGPI: 9.29

Expected 2025

Higher Secondary Certificate, B.G.P.S Mumbai Junior College, Mumbai
Percentage: 90.17

2019 - 2021

SKILLS

Technical Skills	C, Java, Python, JavaScript, React, Node, Express, Django, Python, Flask, YoloV8, MongoDB, SQL, Github, C++, SQL, HTML, Tailwind CSS, LangChain, Machine Learning.
Computer Science	Data Structures & Algorithms, OOPS.
Soft Skills	Observation, Determination, Decision making, Communication, Management Skills.

EXPERIENCE

Software Development Intern - WebApp Team
CPULSER PVT LTD

Dec 2022 - Jan 2023
Mumbai, Maharashtra

- Achieved improvement for CPUSLER PVT LTD by automating HR processes using Django and SQL backend and HTML with Bootstrap frontend.
- Led the development of a HR management system that integrated finance modules, resulting in a improvement in payroll accuracy and timeliness.
- Implemented project management features to streamline workflow and enhance productivity within the organization.

Co-Chairperson - Web-Tech Team
CSI - VESIT

July 2023 - April 2024
Mumbai, Maharashtra

- Led a team of 16 technical officers, overseeing project development, maintenance, and updates for the CSI website based on React and Firebase and mobile app design, resulting in a 20% improvement in user engagement and website traffic.
- Organized and facilitated technical workshops for college students, including a Web3 and decentralized systems workshop, with the help of the tech team, boosting team proficiency in emerging technologies.

PROJECTS

EyeSense

Tech-Stack - Python, Flask, OpenCV, HTML, CSS and YoloV8

Developed EyeSense, a voice-controlled assistant for the visually impaired, featuring object detection, description via Gemini AI, and currency detection. Utilized Python, Flask, OpenCV, YoloV8, HTML, and Bootstrap. Optimized Python code to enhance performance, achieving a 95% accuracy rate with a custom YoloV8 model. Integrated real-time feedback and voice commands, providing seamless interaction and increased independence for users. Praised for its innovation in accessibility. [\(Project\)](#)

Travel Buddy

Tech-Stack - Python, Flask, SQLAlchemy, ML, Bootstrap and Streamlit

Collaborated with a team to develop Travel Buddy, an AI-powered travel itinerary app. Implemented user authentication, real-time Google Maps, and budget tracking using Python, Flask, SQL, and Streamlit. Added a travel community feature for blogs and a machine learning trip recommender. Created personalized itineraries based on location, interests, budget, and duration, and showcased pre-planned trips from travel agencies to enhance user engagement and travel planning efficiency.
