EDUCATION

Vivekanand Education Society's Institute of Technology
Bachelor of Engineering in Information Technology Hons.in Blockchain

CGPA : 9.49
2021 – 2025

KJ Somaiya Junior College of Science and Commerce
HSC in Vocational Electronics

Percentage : 96
2019 – 2021

EXPERIENCE

Software Engineering Intern
AXENOUS

Nov 2023 – Jan 2024
Mumbai , IN

- Successfully integrated external APIs to fetch power plant details, culminating in the creation of comprehensive progress charts.
- Elevated user experience by refining and optimizing the client's IIOT based website for tracking progress in their thermal treatment plant.
- Collaborated closely with the website team to design and develop the official website for VESP Technothon '24 following proper agile practices.

Operations Lead
VESLang Circle

Aug 2022 – Present
Mumbai, IN

- Facilitated a Personality Development Workshop for over 100 students at a rural school.
- Organized and led Public Speaking and Elocution sessions for more than 300 students in the college.
- Supervised and coordinated a council of 25 members to successfully execute literature events.

PROJECTS

MYTUNES - MUSIC STREAMING APP | *Python, Flask, VueJS, MySQL*

- Designed a sophisticated music streaming application leveraging APIs to deliver personalized pages for individual users to enhance user engagement
- Engineered an innovative platform for music creators to connect with their audience and release their singles and albums.

HOSPITAL MANAGEMENT SYSTEM | *Java , MySQL*

- Developed a comprehensive hospital management system to streamline hospital operations and improve patient care with features such as patient registration, appointment scheduling, medical records management, and billing.
- Designed a user-friendly interface with more intuitive navigation and accessibility, and integrated a role-based access control system to ensure secure data management and authorized access to sensitive information

STUDENT DROPOUT AID | *ReactJS , Django , FireBase*

- Developed an AI solution for the Invictus'24 Hackathon that predicts probability of student dropouts and addresses challenges faced by underprivileged students
- Trained the model on a curated dataset to accurately identify at-risk students, further providing personalized insights and recommending tailored resources for them.

ACHIEVEMENTS

Diploma in Programming: IIT MADRAS

Microsoft Azure Fundamentals: AZ-900 ,AI -900 ,DP-900 ,PL-900 ,MS-900 ,MB-910 ,MB-920

Top 5 Finalist: VESIT-Hacks hackathon in Praxis '23.

Shortlisted for internal hackathon of SIH'23.

3 star Badge in Hackerank: SQL, Python and Java.

Winner of CSI Article Writing competition among 100+ participants.

TECHNICAL SKILLS

Languages: Java, Python, C/C++, SQL (MySQL,Postgres, NoSQL, MongoDB), JavaScript, HTML/CSS, PHP

Frameworks: React, Node.js, AngularJS , VueJS, Flask, Django, Laravel

Developer Tools: Git, Docker, VS Code, Visual Studio, PyCharm, IntelliJ, Eclipse, PowerBI, Tableau

Libraries: Pandas, NumPy, Matplotlib , Scikit , Tensorflow
