EDUCATION

- Bachelor of Engineering in Computer Engineering - VESIT, Mumbai, e.2025 CGPA: 9.15
- Smt CHM College- Higher Secondary School (HSC) - 2021 Percentage: 88.33
- Jhulelal Trust School- Secondary School (SSC) - 2019 Percentage: 81.80

SKILLS

- Programming Languages:** Java, C, Python
- Web Technologies:** HTML, CSS, JavaScript, TypeScript
- Database:** MSSQL, MySQL, SQLite, Oracle
- Frameworks:** Angular, Django, Spring Boot, Bootstrap, Tkinter

WORK EXPERIENCE

Pixolo Productions, Mumbai (Front End Developer Intern)

Nov 2023 – Feb 2024

- Enhanced user experience with Ionic Angular, increasing app responsiveness and engagement by 20–30%. Next.js apps have been optimized for quicker page loads and increased effectiveness.
- Developed creative solutions for Next.js projects that led to significant enhancements in site performance and load times, changing user interactions and raising client satisfaction.
- Enhanced team productivity by closely collaborating with project managers to ensure project completion on schedule.

PROJECTS

Job Portal (Angular, Spring Boot, MS SQL)

- Developed an extensive platform to assist administrators, recruiters, and candidates.
- Features which were exclusive to each user role were as follows: administrators could verify firms and handle applications, recruiters could publish and monitor job postings, and candidates could apply for employment.
- Constructed a resume builder with a variety of templates and intuitive user interfaces to enhance user fulfilment and workflows.

Timetable Genius (Angular, Spring Boot, MS SQL)

- Administrators can upload CSV files to register teachers and students in bulk.
- Facilitated instructor exchange requests and conflict checks in the scheduling of lectures.
- Provided students simple access to their schedules and regular reminders for updates in a timely manner.

Social Touch (Angular, Spring Boot, MS SQL)

- Built a dynamic social media platform where users can interact with different content, add trending tags, and create multimedia postings.
- To improve user interaction, integrated features including saves, comments, friend-following, and direct messaging have been added.
- Improved account security with a strong login process and an email-based password recovery tool.

E-commerce (Django, MySQL)

- Created a user experience that is easy to use for quick browsing and selection of products.
- Designed a simplified ordering and cart system to guarantee seamless client interactions.
- Used Google APIs to facilitate safe and easy user authentication and login.
- Integrated the Razorpay Django library to facilitate secure payment processing.

CO-CURRICULAR ACTIVITIES & ACHIEVEMENTS

- Participated in IIT Jodhpur's Dev Quest contest, showcasing a web scraping project for tracking product prices across various ecommerce platforms.
- Participated in TSEC NeedForCode 2.0 Hackathon & TSEC Codenaissance Hackathon.
- 6 star** rating in problem solving in hacker rank.
