PROFILE

I am a passionate Full Stack Developer with excellent problem-solving skills and a strong ability to perform well in a team. I love coding and enjoy collaborating with others to create great solutions.

EDUCATION

Vivekanad Education Society's Institute of Technology

B.E. in Information Technology (2021-2025)

- CGPA -9.17

S.E.S High School & Jr. College

HSC (Science) (2019-2021)

- 94%

S.E.S High School & Jr. College

SSC (2019)

- 93.8%

SKILLS

Coding Languages

Java, Javascript, Python, C

Tools and Frameworks

Node.js, React.js, Flask, Express.js

Databases

MySQL, MongoDB

Devops

Git & Github

Soft Skills

Teamwork, Problem Solving,
Strong Communication

ACHIEVEMENTS

- **Finalist** at **Invictus** Hackathon (VESIT)
- **Finalist** at **Syrus** Hackathon (VESIT)
- **100 Days Badge 2024** (Leetcode)

EXPERIENCE

PALCOA SOLUTIONS PVT. LTD

Software Development Intern | January 2024-May 2024 | Hybrid

- Worked on secure user authentication and CSRF tokens to prevent cross-site request forgery attacks in a React.js PWA application.
- Established system logging functionality to monitor application events and configurations, ensuring operational transparency and security.

NASEOH

Software Development Intern | December 2024-Present | Hybrid

- Developed a software application to streamline their process of providing vocational aids to disabled individuals.
- Created a GUI application using Python tkinter for the frontend and MySQL database for efficient data management. Contributed to designing and implementing solutions to enhance the accessibility of vocational aids for disabled individuals.

CODECLAUSE

Web Development Intern | September 2023-October 2023 | Remote

- Developed an intuitive task management application with a user-friendly interface for efficient task organization and prioritization.
- Designed and implemented a movie rating website where users can search movies and mark movies as watchlist and rate them. Used the OMDB API to fetch movies.

PROJECTS

SAWARI | [Github](#)

React.js, Node.js, Express.js, MongoDB

- A carpooling website enabling drivers to publish rides and passengers to request them. Once drivers publish their rides, passengers can filter the rides based on their desired cities. The website also utilizes location services **Mapbox API** to fetch precise coordinates, enhancing the overall user experience.

IMAGER PRO | [Github](#)

OpenCV, Python, Flask, React.js, Node.js, Express.js, MongoDB

- An application that uses machine learning to recognize faces in images and organize the images into individual galleries for each person. The backend processes each image to identify the person and then stores the image in the corresponding gallery. The model was trained using a **custom-built** dataset.

QUIZGEN | [Github](#)

React.js, Python, Flask, OpenAI API, Gemini API, D3.js

- The application generates **mind maps** based on given notes, as well as summaries and questionnaires derived from the notes provided in pdf format. The content is obtained from the **OpenAI API** and **Gemini API**.
