

JOHAN JOHN

PROFILE

Driven and self-taught Full Stack Developer with a passion for safeguarding the digital realm. Experienced in research, application development, and networking basics, with a keen interest in continuous learning and community building.

PROJECTS

Application Energy Prediction - Report

- Utilized Google Colab for collaborative Python coding, focusing on data analysis and machine learning tasks.
- Employed Matplotlib, NumPy, and Pandas for data visualization, manipulation, and numerical computations.
- Conducted linear regression analysis and statistical testing (scipy.stats) to derive insights from data.
- Analyzed household energy consumption patterns, environmental factors, and predictive variables using an Energy Prediction Dataset.

E-Commerce Sales Analysis - Code

- Worked with Python libraries such as Pandas, NumPy, Seaborn, and MySQL Server for data analysis and visualization.
- Analyzed e-commerce sales data using SQL for querying, data cleaning, and manipulation.
- Visualized key metrics including total orders by year, sales by category, state order counts, average products per order, and the correlation between product price and purchase frequency.

Wireless Data Extraction - Code

- Developed a non-invasive system to extract data from display panels wirelessly. Utilized YOLO Model for real-time object detection enhancing accuracy and speed in data extraction.
- Implemented OCR for extracting text data from display panels. Employed Python, PyQt5, OpenCV, YOLO v5, and PyTorch for seamless integration and performance.

WORK EXPERIENCE

Cyber Security researcher

Jan 2024 - April 2024

Xackton, Mumbai

- Explored and acquired knowledge about various Phishing Tools.
- Currently building a spyware as a research project.
- Built a phishing basic phishing website.

Flutter developer

Jun 2023 - Aug 2023

College, Mumbai

- To develop an app that is used to send printing details to a smart printer present on the same router

Operations Officer

Aug 2023 - May 2024

ISTE, VESIT

- Coordinated with a team of 10
- Planned event and organised them
- Made Interactive Designs and PPTs

Class Representation

July 2023 - May 2024

VESIT

- Managed a class of 69 students
- Planned event and organised them

Placement Coordinator

April 2024 - May 2025

VESIT

EDUCATION

VESIT, Mumbai (2021-2025)

- Bachelor of Computer science & engineering
- 3rd Rank in Academics in my First Year
- Aggregate Cgpi of **9.8**

Jai Bharat Junior College of Commerce and Science, Mumbai (2020-2021)

- Percentage - **95%**

St Pius X High School, Mumbai (2007-2019)

- Percentage - **89.4%**

SKILL

Technical Skills

- Frontend - Html, CSS, ReactJs, JavaScript
- Backend - Node.js, Express.js
- Database - Firebase Data storage, MongoDB, MySQL
- Languages - Java, Python, JavaScript, Dart, Basics of Hadoop
- Network Security - Wireshark, Nmap, Computer networking, Burp suite

Soft Skills

- Fast learner,
- Time Management,
- Leadership

CERTIFICATES

Full Stack Developer

Upgrad

Ethical Hacker

Internship Studio

IAM Developer

Tata Micro Internship (Forge Simulation)
