EDUCATION

B.E. (Artificial Intelligence & Data Science)

Vivekanand Education Society's Institute of Technology.

2022-2025 (CGPI:9.21)

Diploma in Computer Engineering

Govt. Polytechnic Thane.

2019-2022 (93.14%)

SSC

Swami Vivekanand Vidyamandir, Dombivli.

2019 (91.20%)

EXPERIENCE

Cere Labs Pvt Ltd | DevOps Engineer Intern |

May 2024-July 2024

- Developed various Jenkins pipelines to simplify release process.
- Automated their build process
- Dockerized their release process.

TECH STACK

Microsoft Azure, Jenkins, Docker, Git, Subversion (SVN), Dockerhub

LANGUAGES

Java, Python, C, vanilla JS, HTML5, CSS3.

PERSONAL DETAILS

DOB: 06 Sept, 2003

Hobbies: Listening to Indian Classical Music, Singing, Playing harmonium, playing flute, playing tabla.

OBJECTIVE

To explore, enhance and learn programming techniques and cloud computing aspect of Information Technology. Also to simplify deployment and release cycle with the help of optimized coding and respective CI/CD technologies.

CERTIFICATIONS

Microsoft Certified: Azure Administrator Associate | By Microsoft

PROJECTS

1. Automated Release Management System using Jenkins ([Github](#))

Created a Jenkins pipeline which we can trigger remotely when there is a new version of a package. Pipeline creates its docker image and pushes it into the dockerhub with latest version. Also sends notifications on success/failure of the build.

Technology Used: Python, Jenkins, Docker, SVN.

2. Automated Portfolio Deployment System ([Github](#))

Created a Jenkins pipeline which gets automatically triggered when there is any commit to github repo. Changes get deployed over IIS or on localhost.

Technology Used: React JS, CSS, bootstrap (for Portfolio website) and Jenkins.

3. End to End data engineering project on Microsoft Azure.

Created end to end data pipeline on Microsoft Azure. Any change in the database will reflect in its visualization. Data goes through various data-oriented Microsoft azure services.

Services Used: SQL Server, Azure Data Factory, Azure Databrics, Azure Synapse Analytics, Power BI.

4. भावनाविष्कार- An Emotion Detection AI System

Developed a system which takes input as a live feed and predicts emotion of the user using CNN (Convolutional Neural Network).

Technology Used: Python (Keras), Javascript, HTML5, CSS3.
