- Categorized videos into news categories such as politics, health, environment, etc., based on the summary of the video and title of the video.

EXTRACURRICULAR ACHIEVEMENTS

KNOW CODE "24 HACKATHON WINNER (Conducted by KJ SOMAIYA)

2024

SYRUS HACKATHON FIRST RUNNER UP (Conducted by VESIT CODE CELL)

2024

PROJECTS

- **IVR-based medicine ordering system**

https://github.com/ParthWande/Team_Khanaa_Khazaana

This flutter application with flask integration for Twilio service aims to **simplify medicine ordering**.

We utilised Twilio for call operations, and Flutter and Flask for mobile application operations.

Language: Dart; IDE: Android Studio; FrameWork: Flutter, Backend-Flask; Third-Party Services- Twilio, Ngrok

- **Gyaan Saathi (Selected for Google Solution Challenge)**

<https://github.com/masteradios/khaana-khazaana>

This is a flutter application to identify slow-learning students and help them. It includes cognitive games for the development of slow-learning students.

Teachers can assign quizzes to students in real time and also monitor their scores.

Language: Dart, **Python**; IDE: Android Studio, VS code; FrameWork: **Flutter**
