EDUCATION

Vivekanand Education Society's Institute of Technology,Chembur <i>Bachelor of Engineering-Computer</i> CGPA-9.68	2021-Present
Namo Rims Junior College, Pune <i>HSC(Science)</i> 91.17%	2021
Pawar Public School,Pune <i>CBSE</i> 95.4%	2019

EXPERIENCE

Satakshi Technologies, Pune <i>Business Analyst Intern</i> - Conducted data cleaning and management using Python and Excel to ensure data integrity, and automated repetitive tasks. - Created interactive dashboards and visualizations using Tableau to support business decision-making. - Collaborated with team members to identify and implement process improvements in data management, enhancing overall efficiency and accuracy.	Pune <i>May 2024-July 2024</i>
Computer Scoiety of India <i>Senior Public Relations Officer</i> - Guided junior team members, providing mentorship and support to enhance their skills and performance in public relations activities. - Managed promotions for various events, developing and executing strategic PR campaigns to increase visibility and engagement.	Mumbai <i>August 2023-April 2024</i>
Exposy DataLabs <i>Data Science Intern</i> - Customer Segementation Analysis for the given dataset . - Using Python to help clustering of data for the targeted analysis - Analysed the datasets to help create customised product suggestion and identify consumer segment.	Remote <i>Novemeber 2023 -December 2023</i>

PROJECTS

Wireless Extraction of Data - Created a non-invasive system for wireless data extraction from display panels using advanced machine learning and computer vision techniques. - Utilized Python, YOLO for real-time object detection, and OCR for text recognition. - Applied machine learning techniques and Python libraries to analyze data, generating actionable insights and enhancing decision-making. Techstack -Python,PyQt5,PyTorch,OCR,YOLO	<i>July 2023 - May 2024</i>
Analysis of Zomato Data - Conducted EDA on Zomato dataset with 20+ visualizations using Python to identify restaurant trends. - Cleaned and preprocessed data for 10,000+ records, handling missing values and outliers. - Developed regression models ($R^2 = 0.85$) using Linear Regression and Random Forest, improving accuracy with cross-validation and grid search. Techstack :Python,Tableau,SkLearn,Plotly	<i>July 2023 - August 2023</i>
S&P 500 Stock Market Case-Study - Conducted a time series analysis on S&P 500 stock market data to identify trends and patterns. - Utilized Python with Pandas for data handling, and Seaborn and Matplotlib for graphical representation. Techstack : Python, Numpy, Pandas,	<i>January 2024 - March 2024</i>

ADDITIONAL INFORMATION

- Languages:** English, Hindi , Marathi
- Skills:** Python, Java, MySQL, HTML, CSS,Microsoft Excel, Power BI, Tableau, Alteryx,Adobe Photoshop
- Interest:**Graphic Design, Dance, Baking
