INTERNSHIP

VESIT Summer Internship | Descriptive AI

May 2024 - Present

- ResNet + LSTM Model: Implemented and deployed on a Jetson Nano.
- Comparative Analysis: Evaluated Xception + LSTM, ViT + GPT-2, and ViT + BERT architectures.
- Fine-Tuning: Applied on 8k and 30k Flickr datasets.
- Outcome: ViT + GPT-2 yielded the best results in captioning accuracy.

PROJECTS

PLANT DISEASE DETECTION

Mar 2023

- Developed a plant disease detection system using YOLOv5 and MobileNetV2.
- Deployed the model by making a flutter-based mobile application for real-time identification of plant diseases through image analysis

DISCORD BOT

Dec 2023

- Developed a multifunctional Discord bot leveraging Python, enabling users to play audio, engage in mini-games, and interact with the OpenAI API for dynamic responses.
- Implemented audio streaming functionality to allow users to play music tracks and audio clips

Credit Card Fraud Detection System

Dec 2023

- Developed a fraud detection model using Random Forest and autoencoders.
- Used SMOTE for data imbalance, combined Random Forest for complex relationships, and autoencoders for anomaly detection.
- Achieved 99.9% accuracy; focused on precision, recall, and F1-score metrics.
- Used PowerBI for real-time monitoring.

EDUCATION

BEng Artificial Intelligence and Data Science | VESIT

Mumbai University

Expected July 2025

- CGPA: 9.20 (till sem6)
- Major/Minor in Blockchain

12TH(HSC) Science | Pioneer Junior College , Dadar Mumbai

July 2019 - May 2021

- Percentage: 87.83%
