

Education

Bachelor of Technology in Artificial Intelligence and Data Science

Vivekanand Education Society Institute of Technology, Mumbai

2021-2025

CGPA: 9.23

Work Experience

SDE Intern | Reliance Industries Ltd

May 2024 - July 2024

- Worked on a highly classified project involving the development and deployment of robust web applications using FastAPI and PostgreSQL.
- The project focused on creating secure and efficient APIs and automating their data for ease of management.
- Contributed to the successful completion of a critical project for the company, ensuring high standards of security and performance.

ML Research Intern | Spartificial Innovations

June 2023 - August 2023

- Developed a GANs model for Deep Space Image Colorization using python and Astropy module.
- Key contributions include comprehensive model comparisons, showcasing Pix2Pix GAN's suitability for deep-space image colorization, and objective evaluation using metrics like PSNR and SSIM.
- Explored various loss functions and optimizers to enhance colorization performance.

Placement Ambassador | VESIT (Present)

Nov 2023 - Present

- Played a pivotal role in bridging the gap between students and potential employers.
- Responsibilities included organizing career fairs, workshops, and networking events to facilitate meaningful interactions between students and recruiters.
- Have also served as Placement Coordinator in my second year of engineering (June 2022- Nov 2023) managing the company placement drives in the college.

Personal Projects

Aarogyachar

- Flutter and Streamlit-powered e-pharmacy app, seamlessly integrating an advanced ML disease prediction model with a comprehensive database of diseases, symptoms, home remedies.
- The model utilizes symptoms provided by the user to predict potential diseases and offers corresponding recommendations for home remedies.

Swing Trading Bot

- The 'Swing Trading Bot' project is designed to perform technical analysis on stock price data, identify potential swing trading opportunities, and execute trades based on predefined criteria.
- The system integrates multiple components for data extraction, analysis, and visualization.

Vanvasi Sales Portal

- Led the development of a comprehensive website using the MERN Stack. This platform was specifically designed to empower members of the organization to showcase and sell their products effectively.
- User can buy products sold by the vanvasi community and they can also see the information of the maker of the product.

Technical Skills and Interest

- **Programming Languages:** SQL, Python, C, Java, Javascript, HTML+CSS
- **Areas of Interest:** Machine Learning, Web Design and Development, Research.
- **DevOps Tools:** AWS, Git & Github, Jenkins, VScode
- **Cloud/Databases:** MongoDB, Firebase, MySQL
- **Soft Skills:** Strong work ethics, effective communication, teamwork

Certifications and Achievements

- Published a Research Paper "Aarogyachar- An Alternate Therapy" through International Journal of Computer Applications. [🔗](#)
- Certificate of Internship- 1) [🔗](#) 2) [🔗](#)
- Certified in Harnessing Power of data with PowerBI by coursera [🔗](#)
- Certified in Fundamentals of Deep Learning by NVIDIA [🔗](#)
