Mumbai, India

Projects

INSURE (ML-Based Insurance Fraud Detection System) | *MERN, Flask*

- Constructed the frontend of Insure platform where vehicle insurance policy holders can digitally file for a claim.
- On the admin side depending on the parameters of the claim a ML model runs to classify whether the claim is fraud or not.
- Worked majorly with **MongoDB**, **NodeJs** for handling the Backend of the application , **ReactJS** for frontend and for the ML model worked with **sklearn libraries**, and **RapidMiner tool** for model testing

Artify | *React.js*

- React.js-based e-commerce web application that allows users to sell/buy courses, featuring a dedicated shopping page for course-related materials.
- Built a user-friendly interface.

ReRead | *Python, Tkinter*

- Create a user-friendly Desktop Application with Tkinter to buy and sell used books and stationery.
- For database we have used MYSQL.

Technical Skills

Web: HTML, CSS, React.js, Node.js

Languages: Java, C++, Python, Javascript
